Segment Reporting

Local Sales (34% of Revenues)

OW local revenues reported a 21.48% increase in 1Q 2022 to EGP 1,102 million, compared to EGP 907 million in 1Q 2021, while volumes increased by 4.59% on y-o-y basis (+7.59% q-o-q).

In 1Q, **woven products** recorded an incredible 19.16% increase in value with flat volumes. This was mainly due to significant demand in Grade B products, which includes the new collection. This increase was partially due to consumers making an early purchasing decision, in anticipation of price increases in the local market in general. The **tufted products** witnessed an impressive recovery in sales, due to diversifying the distribution channels including big local retailers. Sales increased by 33.47% y-o-y (+21.97% q-o-q), mainly coming from increased sales in “the pieces segment” by 48.53% y-o-y. While volumes in the tufted segment increased 30.13% y-o-y in 1Q 2022. The **non-woven segment** was likewise an outperformer, as sales increased by 25.35% y-o-y while volume declined by 2.27% y-o-y.

Showroom sales (59% of local sales) increased by an impressive 32% y-o-y (+ 108% q-o-q) in 1Q 2022, while **wholesale** revenues reported a 3% y-o-y increase (+ 113% q-o-q). The increase in the showroom percentage was due to management decision to focus on showrooms as a distribution channel. Heading into 2Q 2022, the focus will be shifted towards wholesale as a distribution channel, to fill the gap caused by the import restrictive environment.

Average pricing during the quarter increased 16% y-o-y in the local segment, which was primarily due to selling an elevated product mix, as the new collection is appealing to the consumer which was at a higher price point. In addition to prices increase implemented in March by 5%.

OW opened 5 **new showrooms** across different governorates in Egypt in 1Q 2022. Bringing the total number of showrooms on a group level to 259 showrooms. Management strategy is to increase the number of showrooms across Egypt for the coming 3 years, in order to

maintain OW's leading market share. In addition to expanding OW's online platform through "[Carpets Online](#)" and growing its social media presence.

Export & Overseas Operations (66% of revenues)

Export sales remained strong continuing on 2021 momentum. This translated into export revenues increasing by 16.52% y-o-y (+7.48% q-o-q) in 1Q 2022 reaching EGP 2,163 million, with volumes declining by 3.44%. Certain regions outperformed others namely Europe, Africa and the Arab Region.

European Sales increased 34% y-o-y in 1Q 2022, this was supported by shipments to OW's **key European customer**, which experienced a hike in sales of 60% y-o-y in 1Q 2022 (50% in dollar terms), as new product ranges have been agreed upon, in addition to "free range" products which provide better margins.

The **Arab region** continues to be one of the strongest performing markets, primarily from OW's increasing presence in Saudi Arabia market, with sales increasing 51% y-o-y in 1Q 2022. Arab markets contribution to total revenues reached 7% in 1Q 2022 compared to 3% in 2020 and 6% in 2021. OW export team are also witnessing significant demand from **Africa**, namely Morocco and Libya, with sales increasing 112% y-o-y in 1Q 2022.

The **US region** recorded an increase in Sales by 2% y-o-y in 1Q 2022. This is mainly due to macro-economic factors affecting the region, consequently affecting the purchasing power of the consumer. But unlike past cycles, U.S. housing inventory is historically low, more single-family homes are under construction and the U.S. home deficit will require years to align supply with demand. Remodeling should remain strong with rising home equity and buyers of existing homes still completing long-term projects that they initiated over the past few years. Commercial new construction and remodeling continue to strengthen as business conditions improve and projects that were delayed due to the pandemic are initiated.

Export revenues of the **Tufted Segments** dropped by 17% y-o-y in 1Q 2022 and 29% y-o-y in volume, this drop was owing to the fact that the US region constitutes around 50% of the tufted export segment revenues. As US is facing a slowdown across all aspects, consequently it impacted sales. Due to the company's agility, management took the decision to focus on the local market and direct capacity to cater the local consumer, causing an increase in the local segment by 36% y-o-y in 1Q 2022.

OW remains committed to solidifying and expanding existing client base through marketing campaigns, the development of new products, and ongoing dedication to produce products of notable quality and value. The export team managed to secure 12 new clients through 1Q 2022. OW is known for its quality of service compared to competitors, with a virtual

showroom, E-catalog and no language barriers, these dynamics enable OW to secure long-term clients.

OW USA

OW **U.S.-based subsidiary** recorded sales increase by 0.61% y-o-y in 1Q 2022 in local currency. While in dollar, sales dropped 6.8% y-o-y in 1Q 2022. This was due to several aspects, first, delay in shipments of containers coming from our Egypt based facility, that will be rolled into 2Q sales. Secondly, decline in online sales in the US market, as US consumers are impacted by the general economic downfall.

OW Hospitality (3% of Revenues)

Oriental Weavers hospitality segment caters to several global prominent names, in addition to its local presence. In the local segment sales are up around 99% y-o-y in 1Q 2022, as OW installed several projects including Hotels, Mosques, Universities and New Administrative Capital related projects. In the export segment, sales increased 123% y-o-y in 1Q 2022, as we are witnessing a recovery in the hospitality segment compared to the pandemic era.

Cost of Goods Sold

OW's COGS increased by 27.41% y-o-y to EGP 2,908 million in 1Q 2022, rising at a higher pace than the group's top line figure, as a result of surging raw material costs during the year. Despite multiple price increases implemented by management, OW lagged rapidly increasing raw material cost. Polypropylene prices increased by 35% y-o-y, Polyester prices increased by 61% y-o-y, Latex prices increased by 55% y-o-y, and Nylon increased by 79%. This resulted in, gross profit for 1Q 2022 decrease by 25.81% y-o-y (-16.32% q-o-q), with associated margins of 10.93% versus 17.40% in 1Q 2021.

Interest Income / Expense

The tax rate is a function of earnings contributions from taxable subsidiaries verses non-taxable free zone subsidiaries, such as Oriental Weavers International and Oriental Weavers Textiles. The higher effective tax rate is attributed to dividends recognized in 1Q in free zone companies, noting that the effective tax rate will normalize throughout the year.

Net Profit

OW's attributable net profit was EGP 236 million in 1Q 2022, a decline of 21.17% y-o-y. This drop is attributed to lower gross profit, due to higher raw material cost. Net profit margin stood at 7.97% in 1Q 2022, compared to 12.42% in 1Q 2021.

Debt

On March 31st, 2022, OW debt breakdown was 60% USD, 10% Euro and 30% EGP, compared to 53.1% USD, 9.4% Euro and 37.5% EGP on December 31st, 2021.

Cash

Cash and Treasury bills recorded EGP 3.4 billion in 1Q 2022 compared to EGP 2.5 billion on December 31st, primarily due to the foreign currency composition. Cash breakdown is as follows 18% Euro, 56% EGP and 25% in dollars.
